Mixmod is a software package for Model-Based supervised and unsupervised classification on qualitative and quantitative data.

Mixmod included a library of calculation (mixmodLib) and tools adapted to a wide spectrum of users and needs: a graphical user interface (mixmodGUI), functions for R environments (Rmixmod) and Matlab (mixmodForMatlab).

**Language**: C++, R, Matlab et Scilab

**Environment**: Windows & Linux

**Keywords**: classification, mixed data, data mining, data modeling.

**License**: GNU GPL

**Academic partners**: Contact: christophe.biernacki@inria.fr
